Bachelor	English
Datenbanken I	Digital Software & Business Engineering	45	September – February	Bachelor	German
Interdisciplinary Project The lecturer is mentoring the students and monitoring their process. Students acquire problem solving competencies by working out advanced assignments which span all branches of the master's program in interdisciplinary teams. They thus learn how to divide tasks efficiently and how to present and write down project plans. In addition, they acquire interdisciplinary thinking, which particularly marks them out as scientists and engineers. Consequently, graduates are prepared to work in teams of plant, chemical, energy, and environmental engineers to accomplish the respective project tasks with a holistic approach. The lecturer is mentoring the students and monitoring their process.	Environmental, Energy and Process Engineering	45	October – January	Master	English

Name of the course	Department	Number of teaching hours	Time Period	Level	Language
Revision Course in Process Technology <i>Chemical process engineering:</i> Students are familiar with the methods of chemical process engineering and fundamentals of calculation. They know how to calculate mass balances for simple reactions. <i>Thermal process engineering:</i> Students are familiar with the most essential thermal unit operations. They know how to plan previously discussed thermal separation processes in line with characteristic operational parameters by means of numerical and graphical methods. <i>Mechanical process engineering:</i> Students acquire the basic principles of the description of disperse systems. They are acquainted with the most important methods of particle measurement technology and familiar with devices and machines commonly employed in mechanical process engineering.	Environmental, Energy and Process Engineering	Depends on the selection of the topic	October – January	Master	English
Business Communication	International Relations Office	32	October – January	Bachelor	English
Entrepreneurship	International Relations Office	32	October – January	Bachelor	English
Business & Culture	International Relations Office	33	October – January	Bachelor	English
Marketing	International Relations Office	32	October – January	Bachelor	English
Strategic Management	International Relations Office	32	October – January	Bachelor	English
International Business	International Relations Office	32	October – January	Bachelor	English
Innovation and Product Development	International Relations Office	32	February	Bachelor	English

Spring semester 2021

Datenbanken II	Digital Software & Business Engineering	45	March – June	Bachelor	German
Digital Communication	International Relations Office	32	March – Mid May	Bachelor	English
Doing Business with ...(country/region/part of the world)	International Relations Office	32	March – Mid May	Bachelor	English
Intercultural Management	International Relations Office	32	March – Mid May	Bachelor	English
Negotiation	International Relations Office	32	March – Mid May-	Bachelor	English
Organizational Behaviour	International Relations Office	32	March – Mid May	Bachelor	English
Strategic Management	International Relations Office	32	March – Mid May	Bachelor	English
Entrepreneurship	International Relations Office	32	End May – Mid June	Bachelor	English
Innovation Management	International Relations Office	32	End May – Mid June	Bachelor	English
International Marketing	International Relations Office	32	End May – Mid June	Bachelor	English
International Business	International Relations Office	32	End May – Mid June	Bachelor	English

1 Teaching Unit (TU) = 45 min / 8 TU correspond to a full day
 Number of TU depends on the course structure (from 15 TU to 45 TU)
 Courses are usually offered as an intensive block module over several consecutive days

Application deadlines: 15 March 2020 / 15 November 2020
