

Student from ENSAM

"IFE offers a chance to participate in the European Project Semester, which is a very good way to develop skills needed in individual as well as group work. In my opinion, this project constitutes a very useful bridge between the student and professional environment."

Student from University of Strathclyde

"EPS is a great opportunity to work in a close team with like-minded people from all over Europe. There is a wide range of interesting projects available and you can be sure you will learn something useful. EPS will look great in your CV, especially if you plan to work abroad after graduating. The department is really helpful and the social life among EPS participants is great."

In the previous years there have been a variety of projects successfully completed with the framework of EPS, among others:

Research on Lightweight Electric Vehicles. DIY Model Testing
Lunar Regolith – the Dusty Side of the Moon
Grandpa, Please Show Me Your Perspective.
Immersion Experience with Augmented Reality
Hydrogen Vehicles Fire Safety
Preventing Discrimination through Gamification

EPS is an exciting semester-long program where you'll work on a large, multidisciplinary project in an international student team. All projects tackle real-life problems, technological challenges and/or societal demands, and are done in partnership with external organizations or different university faculties. Alongside the main project, you'll take a few intensive courses.

APPLICATIONS, REQUIREMENTS AND IMPORTANT DATES

You must have completed a minimum of 4 semesters at time of arrival and have a good command of English (B2 level or above).

Applications deadline for autumn semester:

15 July

Classes start:

beginning of October

Applications deadline for spring semester:

30 November

Classes start:

beginning of March

STUDENT-CENTERED LEARNING

At the heart of EPS is student-centered learning. You'll collaborate with peers from various engineering and business backgrounds, all communicating in English. You and your teammates will manage your project autonomously, making key decisions with guidance from university tutors. Teams use various approaches, such as Project-Based Learning, Design Thinking, Problem-Based Learning, to complete their projects.

FULL SEMESTER WORKLOAD

EPS covers an entire semester's workload, earning you 30 ECTS credits. It is available in both semesters and includes the following courses:

Interdisciplinary Project (20 ECTS)

Team Building and Communication for Projects (4 ECTS)

Innovation for Projects (2 ECTS)

Project Management (2 ECTS)

Polish Language and Culture (2 ECTS)

WHY TUL?

TOP-RANKED TECHNICAL SCHOOL IN POLAND

At Lodz University of Technology (TUL), we pride ourselves on being among the best technical schools in Poland. We continuously update our programs to meet your needs, ensuring you get the best education possible.

A VIBRANT CAMPUS CLOSE TO THE CITY CENTER

Our campus is conveniently located near the city center, allowing you to easily enjoy the unique atmosphere and cultural diversity of Lodz. Experience the rich blend of traditions and modernity that our city offers.

SUPPORT FOR INTERNATIONAL STUDENTS

Joining us from abroad? Several student organizations e.g. ESN-EYE are here to help you settle in and make your stay in Poland unforgettable. These groups provide support and organize activities to help you adjust to your new surroundings.
