ESPA

Software Developer Internship (RAWFE1806)

Start date
October 2021

Duration
6 months

Languages
Good spoken and written English levels are required (B2 onwards)

Location

Ascot, England.
Ascot is a small town located on the southern end of Windsor Great Park in Berkshire, just six miles from Windsor and six miles from Eton. There are lots of places to explore including military museums, nearby dry ski slopes and theme parks. Famed for its prestigious racecourse, the food spots here are not to be missed. If you fancy a trip to the capital city, it's just an hours train ride to London!

Are you eligible?
Are you a registered student?
                    Or
Are you eligible to participate in the Erasmus+ programme?

Benefits
See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

Role

This is a fantastic opportunity for an influential, resourceful software developer, who has a keen eye for detail and great problem-solving skills, to work at this fast-growing digital agency. Mentored throughout, you will work closely with, UI development, producers and project management and use your knowledge and expertise to develop and test well-structured and maintainable code; adhering to the team's current workflow and best practises to deliver projects on time, on budget and to agreed specifications. If you are looking to work in a buzzing, successful environment, amongst peers with a huge wealth of experience and a real passion for digital, this is the opportunity for you.

Tasks

- Develop well structured, maintainable code on a wide range of projects and test
- Have a deep appreciation and understanding for best development practices
- Translate your understanding of technical requirements, issues and queries
- Maintain a good awareness of developments in the industry, assessing technical options, assisting others and sharing knowledge for continuous improvement and develop better ways of working

Desired Skills

- A developer with a passion to share knowledge and experience to colleagues.
- Strong knowledge of handwritten PHP, Javascript, HTML and CSS.
- Experience with Laravel, Symfony, CodeIgniter or similar MVC frameworks.
- Experience developing RESTFul APIs.
- Strong knowledge of Object Oriented Design Patterns (PHP)

Good to have

- Experience working with a CMS e.g Concrete5, Drupal, DevOps, Systems Administration.

Host Company

This host is a fast-growing digital agency who work in partnership with their clients to produce digital products and services that create a lasting, positive, impact. Why do staff love working at this host company? In summary, it's probably down to being part of the best digital team in the UK. Evolving every day and playing a part in the continuous effort for personal and client success. No deadwood, no egos, no arrogance; just a solid team of passionate and positive people making a real difference. They think strategically, critically, and commercially about what they and encourage each other to reach for higher standards, and the rate of improvement is always staggering.
